

AATCC Certificate Training Program

- Ø In January 2006, we were authorized by the AATCC, Technical Center in Research Triangle Park, N.C., for teaching AATCC test methods to technicians and laboratories in China.
- Ø The AATCC training program covers the most popular AATCC test methods. Included colorfastness, appearance after laundering, soil release, water resistance and repellency, and dimensional change.
- Ø AATCC Training Certificates will be given to trainees after completion.
